DELIVERABLE - Installation of the environment

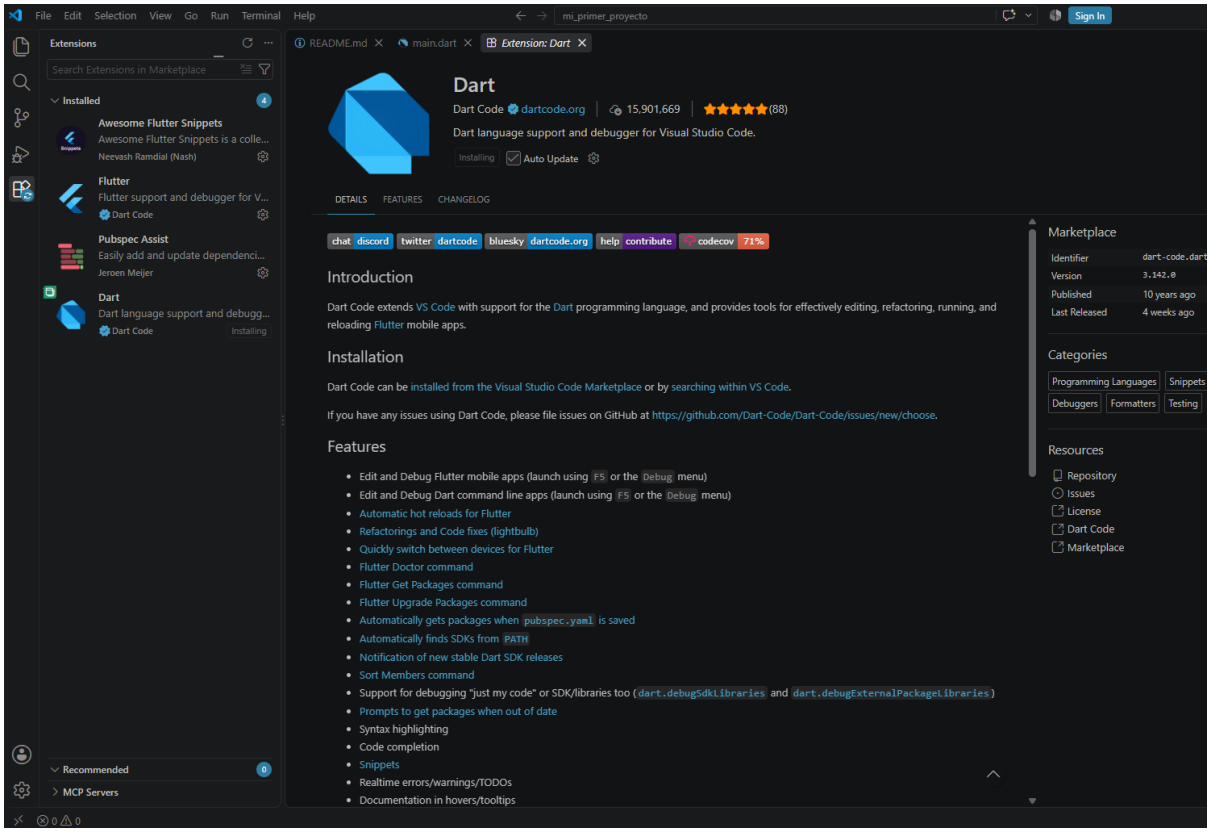

1.Installing Android Studio and the SDK tools you need.

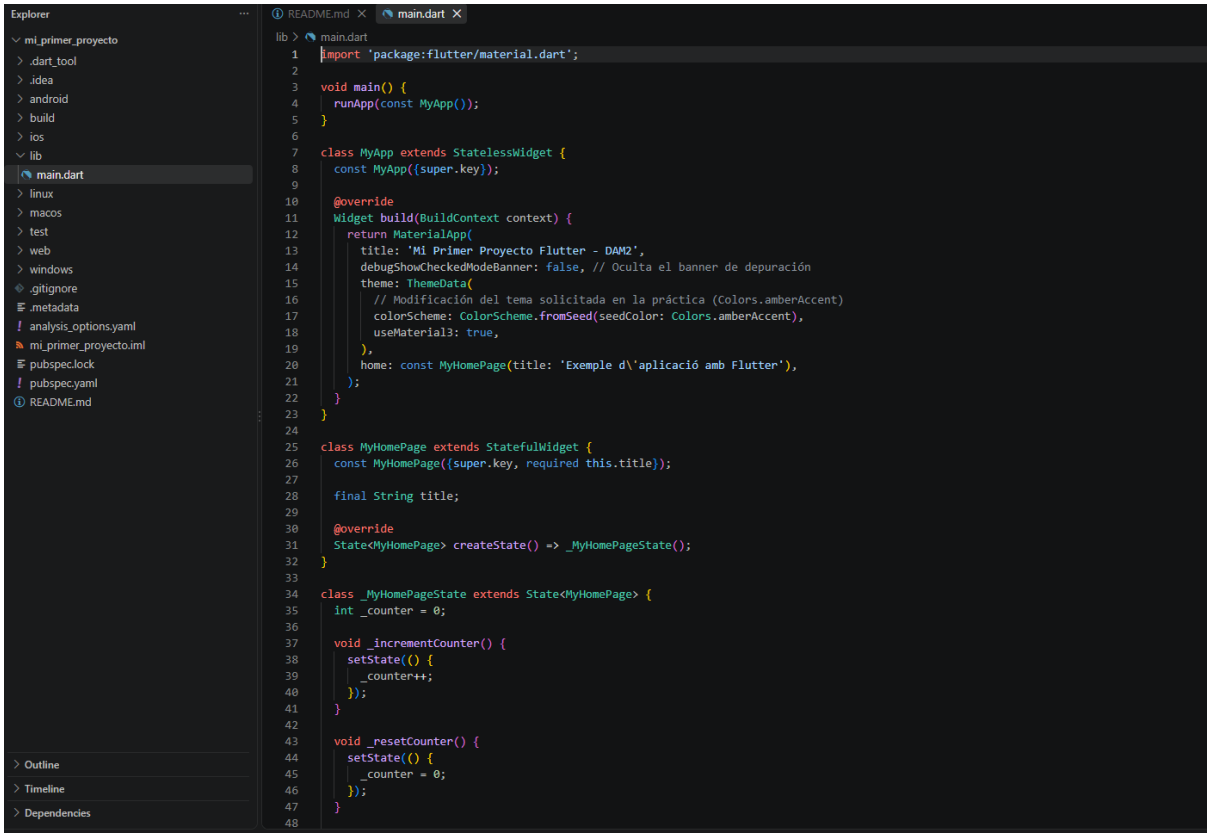

2.Installing Flutter SDK. Use flutter doctor to check everything is OK.

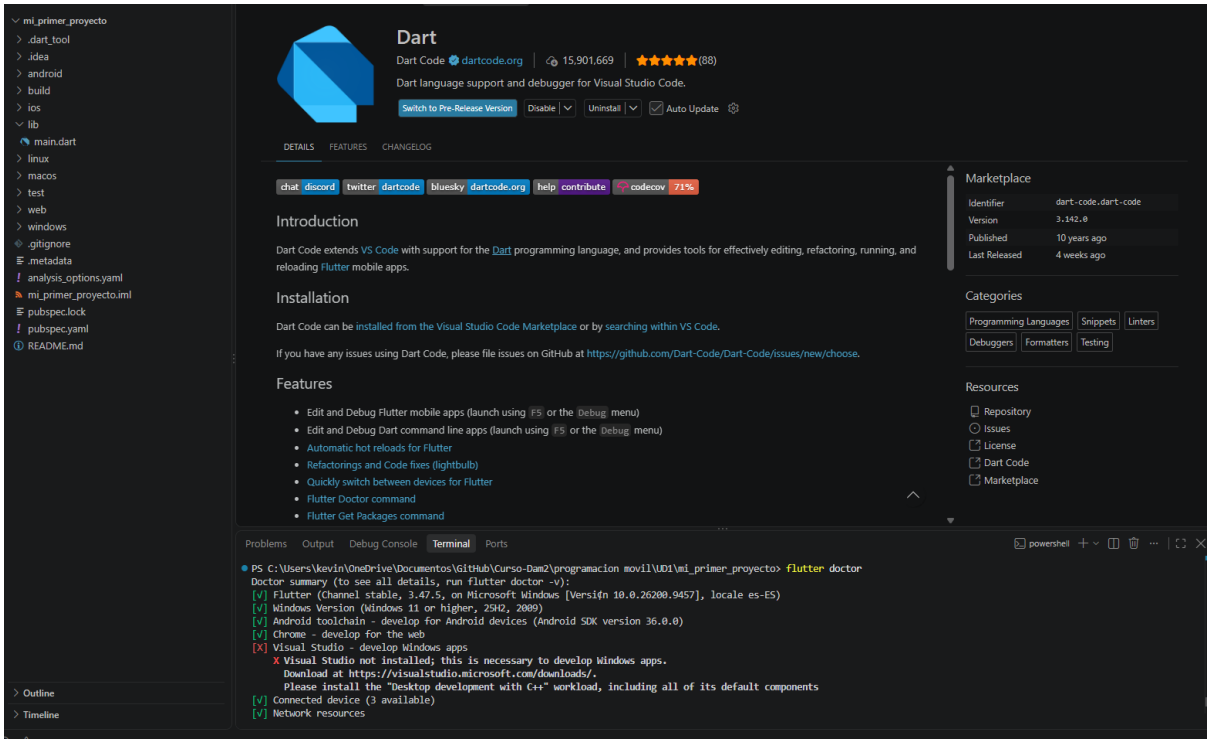

3.Configuring the Code Editor you are going to use (VS Code (lighter) or Android Studio (heavier)).

4.Create a simple program with Flutter. You may use the one in here (my First project with Flutter).

Introduction
Dart Code extends VS Code with support for the Dart programming language, and provides tools for effectively editing, refactoring, running, and reloading Flutter mobile apps.
Installation
Dart Code can be installed from the Visual Studio Code Marketplace or by searching within VS Code.
If you have any issues using Dart Code, please file issues on GitHub at https://github.com/Dart-Code/Dart-Code/issues/new/choose.
Features
Edit and Debug Flutter mobile apps (launch using F5 or the Debug menu)
Edit and Debug Dart command line apps (launch using F5 or the Debug menu)
Automatic hot reloads for Flutter
Refactorings and Code fixes (lightbulb)
Quickly switch between devices for Flutter
Flutter Doctor command
Flutter Get Packages command
